## REGULATORY AUTHORITY

National Insurance Commission

**MISSION**

To help our Stakeholders have peace of mind

**VISION**

To be one of the top Insurance Companies of choice in Africa

**PRINCIPLES**

**Integrity**

We will act with openness, fairness, integrity and diligence. We will always adhere to the applicable laws, regulations and standards of doing business.

**Performance**

We will promote a positive and challenging high performance culture. We will do this by encouraging personal accountability, development and measuring, reward and recognizing success.

**Responsibility**

We will act responsibly as individuals and as a Company. This applies to the management of our business, our approach to corporate interaction with key external stakeholders.

**Values**

- Working in teams
- Servicing our Customers
- Respecting each other
- Being proactive
- Growing our people
- Delivering to our Shareholders
- Guarding against arrogance
- Upholding the highest levels of integrity

## OUR COMMITMENTS

### Customers

A satisfied and loyal customer base is core to our business.

We are committed to:

- Delivering the consistent and reliable levels of customer service.
- Acting with integrity, due care and diligence.
- Communicating openly, honestly and with sensitivity and understanding.
- Listening to our customers.
- Handling complaints fairly and promptly.
- Respecting our customers' rights to privacy and confidentiality.
- Protecting our customers and our business from fraud.

### Business Partners

We demand high standards from the companies we work with and believe that they should expect the same from us.

We are committed to:

- Carrying out our business with fairness and integrity.
- Being reliable and quick to respond.
- Awarding contracts and selecting business partners solely on the basis of fair and objective business criteria and having regards to high ethical standards.
- Respecting all obligations and confidentiality.
- Protecting our customers and our business from fraud.

### Employees

Motivated and skilled employees are critical to our success.

We are committed to:

- Fostering a positive and challenging high performance culture.
- Rewarding superior performance.
- Encouraging personal development.
- Encouraging a culture of frank and honest communication.
- Encouraging teamwork and strong leadership.
- Providing a safe and secure working environment.
- Encouraging diversity and equal opportunities.
- Ensuring that grievances and unethical behaviour can be raised without fear of discrimination.

In return we expect our employees to:

- Act with integrity.
- Take responsibility and accountability for their own actions.
- Show support and commitment for change.
- Focus their energy in getting the best from themselves and others.
- Have the confidence and courage to act with conviction.
- Show understanding for and meet external and internal customers needs.
- Show a relentless desire for success.
- Create positive and effective working relationships.

### **Regulators**

We have an open, cooperative and transparent relationship with our regulators.

We are committed to:

- Dealing with our regulators in an open, cooperative and transparent manner.
- Managing our business with appropriate standards of risk management and controls.
- Preventing and reporting any instances of significant financial crime.
- Preventing breaches of relevant regulatory requirements.
- Complying with all set standards.

### **Community & Environment**

We believe in continuous improvement of our environmental performance and in taking action around emerging environmental issues. Whenever we operate, we will seek positive engagement with local communities.

We are committed to:

- As a business, we have a responsibility to manage our impacts on the environment through appropriate use of resources such as energy, paper and water and the investment of our assets.
- We also have a responsibility to take proactive action on environmental issues that are likely to affect our business and community at large.
- In each of these areas, we will look to make continuous improvement and actively monitor our performance.

### **Shareholders**

We are committed to fulfilling the aspirations of our shareholders through a commitment to business performance, and high standards of transparency, communication and corporate governance.

We are committed to:

- A culture of business performance, focused on delivering returns to shareholders.
- Comprehensive and transparent disclosure.
- Aiding Shareholder's understanding through the disclosure of relevant financial and non-financial information.
- Listening to the views of our shareholders.
- Managing our business with appropriate standards of risk and control.
- Ensuring due care in the selection of our third party advisers, including our auditors.
- Preventing and reporting any market abuse.
- Acting with due sense of responsibility on confidence entrusted to us.

**ENTERPRISE RISK MANAGEMENT**

Veritas Kapital Assurance Plc has a robust and dynamic enterprise risk management framework fashioned along with the requirements of NAICOM and the Committee of Sponsoring Organization of the Treadway Commission (COSO). Proper risk management remains essential to the business activities of the company. The framework upholds a risk management culture where everyone is involved from the levels of the Board and Executive committees down to risk owners and respective risk units.

The Company's Enterprise Risk Management framework establishes the context, identifies, analyzes, evaluates, treats, monitors, communicates, and reviews the key risks it assumes in carrying on its business. These risks include market, credit, operational, liquidity, business, reserve, reputational, underwriting, reinsurance, claims risks, as well as legal, compliance risks. Enterprise risk management risk includes management's approach to risks inherent in the business and its appetite for these risk exposures. Under this approach, the Company continuously assesses its key risks and monitors the risk profile against approved limits. The main strategies for managing and mitigating risks include policies, procedures and tools that target specific broad risk categories.

**Enterprise Risk Management Principles.**

The Company's risk management principles optimize value creation and returns on investments. They assist the Company in achieving its vision and delivery of business objectives. As part of the risk strategy to manage all the foreseeable key risk exposures, our guiding principles;

- i Uphold the Company's integrity and value system;
- ii Support compliance to regulatory requirements;
- iii Aid the understanding of the potential upside and downside of key risks;
- iv Increase probability of success and reduce the uncertainty of achieving the organization's overall objectives;
- v Add sustainable value to all the activities of the organization;
- vi Assure business growth with financial stability
- vii Support the culture that "managing risk is everybody's responsibilities"

Our risk management context is entrenched in our mission statement of becoming one of the top insurance companies of choice in Africa through wealth protection by a team of risk and investment managers that provide our customers and other stakeholders with effective, creative solutions, assuring their financial security with our superior strength and capacity in the Nigerian market space.

**Our Risk Culture**

- a) The responsibility for risk management in the Company is fully vested in the Board which in turn delegates such to senior management.
- b) The Board and Senior Management consciously promote a proactive approach to risk management, ensure that the sustainability and reputation of the Company are not jeopardized while expanding its market share.
- c) The Company's management creates awareness of risk and risk management across board.
- d) The Company continually subjects its products, distribution channels, locations and customers to effective risk assessment and it will not engage in any business until it has objectively assessed and determine how to manage the associated risk.
- e) The Company pays adequate attention to both quantifiable and unquantifiable risks

**Risk Management Framework**

Our risk management framework was structured and embedded in our culture and processes. There are clear levels of responsibilities (from the Board of Directors to the Unit Staff) assigned for adequate management of our business risks.

We operate and maintain three levels of risk governance structure for the oversight and management of risk. These are:

**1st line of defence: Management**

The Board of Directors and the Board Risk Committee are charged with the responsibility for oversight of the Enterprise Risk Management process, proposing and approving the Risk Appetite level for the business and delegating responsibility of detailed oversight to Risk Committee. It also comprises the process or the risk owners who execute the controls to enhance the probability that the organization's objectives will be achieved.

**2nd line of defence: Risk oversight**

This comprises the Risk Management Committees and the Chief Risk Officer of the Company.

The Management evaluates the risks inherent within the business and ensures that they are appropriately captured within the business Risk Profile. The Chief Risk Officer ensures an understanding of Risk Management process throughout the organization in order to embed, improve continuously a risk awareness culture, work with business management to review and update the Risk and control register.

The Chief Risk Officer (CRO) is also responsible for implementing the policies and procedures contained in the risk framework. The role of the Chief Risk officer includes communicating the Company's risk profile to the Board and Management Committee as well as communicating the decisions of the Board and Risk Management Committee to the other members of the Company.

#### **3rd line of defence: Independent assurance**

It comprises the audit and internal control and the external auditors' function that provide independent and objective assurance of the effectiveness and adequacy of risk management control and governance processes.

#### **Risk Appetite**

The Company strives to drive its business initiatives without loss of value or unmitigated exposures to inherent risks. In order to improve the value of shareholders' wealth and remain profitable, the Company designed its appetite considering risk exposures at any given situation. The risk appetite represents the amount of risk exposure or potential adverse impact from an event that the Company is willing to accept/retain. The risk appetite of the Company is set by the Board of Directors annually, and it is aimed at minimizing erosion of earnings or capital due to avoidable losses in investment and underwriting records, or from frauds and operational inefficiencies. The Company's Risk Appetite objectives include:

- i) Consistently strive to minimize overall cost of risk exposure and its management through effective risk mitigation practices.
- ii) Optimization of capital employed through enhanced returns on equity
- iii) Low appetite for operational risk. These risks are mitigated and controlled where the cost of control is equal to the marginal cost of the risk.
- iv) Zero appetite to internal fraud activities.

#### **Risk Management Policies and Procedures**

The Enterprise Risk Management policies and procedures which have been strategically instituted aim at managing potential, inherent and residual risk categories in our operations.

The Board recognizes that risk management is critical to the achievement of corporate objectives and has actively encouraged a risk culture that embraces innovation and opportunity, calculated risk-taking and acceptance of risk which is inherent in all our activities, whilst reducing barriers to successful implementation of risk controls.

#### **Risk Classification**

The Company can be exposed to many types of risks while carrying on its business. Some of these include:

##### **Market Risk/Investment Risk**

This is the risk to a Company's financial condition resulting from adverse movements in the level or volatility of market prices. The Company has a structured process and basis for measuring and calculating the probability of loss and possible impact on the Company's capital resources caused by adverse changes in the price of stock and shares, property, exchange rates and other market conditions that are relevant. The Company has established investment limits in its operational guidelines and policy of assets diversification in line with NAICOM regulations to prevent over concentration and over exposure to any particular market.

##### **Credit Risk**

This is the risk that counterparty will default on payment or fail to perform an obligation to the Company. The Company has a system for conducting due diligence on the credit worthiness of any party to which it has credit exposure. The Company does not ordinarily grant credit facilities to third parties in the course of its business but could have low credit risk associated with redeeming of credit notes by Insurance Brokers in accordance with "No Premium No Cover" by NAICOM.

Our placements in banks is also determined by the rating (strength) of the bank and considers NAICOM guideline on limit of exposure to a single bank.

**Operational Risk**

This is the risk of loss from inadequate or failed internal processes, people and systems or from external events which arises from the potential that inadequate information systems, operational problems, breaches in internal controls, fraud, or unforeseen disasters will result in unexpected losses. The Company has policies that cover risk that may arise from people, systems and internal process failures. The policies include staff recruitment, training, retention plans, succession plans, remuneration and welfare benefits, designing standard operating procedure and policies, driving compliance culture, process automation, Information Technology (IT) support systems, data integrity, IT systems access controls, etc.

**Liquidity Risk**

Liquidity risk exist when there is insufficient cash flow to meet the Company's operational and financial obligations and is usually associated with inability to liquidate assets or obtain funding from external sources to pay claims and other liabilities when due. The Company manages its liquidity risk through appropriate assets and liability management strategies through the Investment Committee. Monthly reports and review of liquidity gaps are conducted to assess the level of liquidity risk.

**Reinsurance Risk**

This is the risk of inadequate reinsurance cover to mitigate underwriting risk. It usually occurs when there is insolvency of a reinsurer, discovery of exposures without current reinsurance coverage, or exhaustion of reinsurance covers through multiple losses. The Company has documented reinsurance policies for adequate reinsurance arrangements and treaties for all categories of insurance business transacted. The policies include the process for Reinsurer selection, monitoring, claims recovery, etc.

**Underwriting Risk**

Underwriting is the process by which an insurer determines the conditions necessary and suitable to accept insurance risk. The risk crystallizes when there are severe and frequent claims against the Company's projected capacity. The Company has embedded internal control processes to guide its insurance business against the risk of unexpected losses and capital erosion. There is a well-documented underwriting policy and procedures which are enforced throughout the organisation.

**Business Risk**

The Company's business risk is associated with gaining market shares and remaining profitable. This risk is considered through documented process for product development and launch, business segment profitability analysis, stakeholder's engagement as well as being embedded in our brand.

**Reputational Risk**

This is the risk of events that could cause public distrust and damages to the Company's integrity, brand and goodwill especially in the eyes of the customers, regulators, competitors, and the general public. We manage reputational risk through a structured approach for defining and implementing core values and acceptable standard of behaviour which the staff are expected to follow while conducting the day to day business of the Company. The Company's risk assessment and monitoring process has embedded controls for testing reputational risk and the outcome of such exercise is communicated to the Board Risk Committee on a quarterly basis.

**Legal/Compliance Risk Management**

The Company has procedures to ensure that all statutory regulations are completely adhered to by the business unit at all times. These regulations include those set by NAICOM and other relevant agencies of government. There are internal control processes that identify potential breaches to the regulations and are promptly mitigated. Some of the control processes include:

- a) Know -your-customer (KYC) procedure
- b) Anti-money laundering/combating the financing of terrorism (AML/CFT)
- c) Anti-bribery and corruption measures
- d) Guidelines for adherence to Corporate Governance principles
- e) Gift policies
- f) Whistle blowing policies

**Risk Report**

Risk assessments are collated and presented in a report called the Risk Report. The risk report draws senior management's attention to the key risk as well as the adequacy of existing controls to mitigate the risk. The risk report provides a summary of the ratings of the significant risks and the probability of occurrence within a specific period. This helps to estimate and prevent the potential operational and financial losses.

**Risk Control Self-assessment (RCSA)**

The Company has a structure for risk assessment on periodic basis and this is known as Risk Control Self-Assessment (RCSA). It involves the identification of procedures or assessments that need to be performed periodically to assure that key controls are in place and are working effectively as designed. The controls are proactively assessed through risk analysis of our processes and review of policy requirements, loss events, and audit findings. The Company then updates the controls required to accomplish policy requirements, test the processes and controls for adequacy of capability in risk mitigation. Risk Champions are engaged in each business or risk unit to facilitate the process of risk control self-assessment in the Company.

**Health Safety and Environment (HSE) Management**

The Health Safety and Environment Management has been instituted to provide and maintain safe healthy working conditions, work equipment and systems for all staff. This responsibility also extends to visitors, contractors and others who may potentially be affected by our activities. The Health and Safety Policy framework strengthens the policy statements, roles and responsibilities of the HSE officer.

**Business Continuity Plan (BCP)**

The Business Continuity Plan (BCP) has been designed to ensure sustainability against operational threats and promote the continuity of critical operations in the event of a disaster or disruption to our operations. The BCP outlines contingency procedures to follow in the event of emergencies. We aim to improve on gaps identified during any testing period.

**RISK MANAGEMENT DECLARATION**

The Board, Enterprise Risk Management Committee of Veritas Kapital Assurance Plc hereby declares as follows:

- a) The Company has systems in place to ensure compliance with NAICOM guidelines;
- b) The Board is satisfied with the efficacy of the processes and systems surrounding the production of financial information of the Company
- c) The Company has in place a Risk Management Strategy, developed following the requirements of NAICOM's guideline on Enterprise Risk Management (ERM), setting out its approach to risk management; and
- d) The systems that are in place for managing and monitoring risks, and the risk management framework, are appropriate to the company, having regard to such factors as the size, business mix and complexity of the company's operations.

**STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES****1.1 Reporting Entity**

Veritas Kapital Assurance Plc ("the company") was initially incorporated under the name of Kapital Insurance Company Limited as a private limited liability company on the 8 August, 1973. on 14 March 2007, it acquired and merged with two other insurance companies became a public limited liability company. its shares are quoted on the Nigerian Stock Exchange.

Its Head Office is located at 497 Abogo Largema Street, Off constitution Avenue, Central Business District, Abuja Nigeria.

The Company has 91.46% equity interest in Veritas Health Care Limited and 70% interest in Veritas Glanvills Pensions Limited and 51.53% in Goldlink Insurance Plc. The company comprises of two subsidiaries, an associate and the parent company.

**1.2 Principal Activities**

The principal business of the company is underwriting of non-life insurance risks.

The subsidiaries activities are:

Veritas Glanvills Pensions Limited, the administration and management of pension fund assets.

Veritas Health Care Limited provision of health insurance.

**1.3 Components of Financial Statements**

The Consolidated Financial statements comprise the Statements of Comprehensive income, statements of Financial Position, Statement of Changes in Equity, Statements of Cash Flows, and the accompanying Notes.

Income and expenses (excluding the components of other comprehensive income) are recognised in the profit or loss segment of comprehensive income to arrive at the profit for the year.

Other comprehensive income is recognised in the other comprehensive segment of the statement of other comprehensive income and comprises items of income and expenses that are not recognised in the statement of profit or loss as required or permitted by IFRS.

The addition of the profit for the year and the other comprehensive income gives the total comprehensive income for the year.

Reclassification adjustments are amounts reclassified to statement of comprehensive income in the current period that were recognised in other comprehensive income in the current or previous periods. Transactions with the owners of the company in their capacity as owners are recognised in the statement of changes in equity.

**1.4 Basis of preparation and measurement**

The Consolidated and separate financial statements are prepared in compliance with International Financial Reporting Standards (IFRS) and the requirements of the Companies and Allied Matters Act, Insurance Act, 2003 and regulatory guidelines as pronounced from time to time by National Insurance Commission (NAICOM). Historical cost basis was used in preparation of the financial statements as modified by the certain items of:

- Property plant and equipment at valuation
- investment property at fair value
- investment at fair value
- impaired assets at their recoverable amounts

**1.5 Compliance with IFRS**

These Consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) and IFRS Interpretations Committee (IFRIC) Interpretations applicable to companies reporting under IFRS as issued by the International Accounting Standards Board (IASB). Additional information required by national regulations have been included where appropriate

**1.6 Going Concern status**

The consolidated financial statements have been prepared on the going concern basis. The company has no intention or need to reduce substantially its business operations. The management believes that the going concern assumption is appropriate for the company and company due to sufficient liquidity and based on historical experience that shortterm obligations will be refinanced in the normal course of business. Liquidity ratio and continuous evaluation of current ratio of the company is carried out to ensure that there are no going concern threats to the operation of the company.

**1.7 Significant judgements and key sources of estimation uncertainty**

In the process of applying the accounting policies adopted by the company, the Directors make certain judgements and estimates that may affect the carrying values of assets and liabilities in the next financial period. Such judgements and estimates are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the current circumstances. The directors evaluate these at each financial reporting date to ensure that they are still reasonable under the prevailing circumstances based on the information available.

The preparation of the company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future. These factors should include:

The judgements made by the directors in the process of applying the company's accounting policies that have the most significant effect on the amounts recognised in the financial statements include:

- **Claims arising from insurance contracts**

Liabilities for unpaid claims are estimated on a case by case basis. The liabilities recognised for claims fluctuate based on the nature and severity of the claim reported. Claims incurred but not reported are determined using statistical analyses and the company deems liabilities reported as adequate.

- **Fair value of unquoted equity financial instruments**

The fair value of financial instruments where no active market exists or where quoted prices are not otherwise available are determined by using valuation techniques. In these cases, the fair values are estimated from observable data using valuation models.

- **Property, Plant and equipment**

Property, Plant and equipment represent one of the most significant proportion of the asset base of the company, accounting for about 26% of the company's total assets. Therefore the estimates and assumptions made to determine their carrying value and related depreciation are critical to the company's financial position and performance.

The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. Increasing an asset's expected life or its residual value would result in the reduced depreciation charge in the statement of comprehensive income.

The useful lives and residual values of the property, plant and equipment are determined by management based on historical experience as well as anticipation of future events and circumstances which may impact their useful lives.

- **Taxation**

Whether it is probable that future taxable profits will be available against which temporary differences can be utilized

**1.8 Functional and presentation currency**

The consolidated financial statements are presented in Nigerian Naira (Naira), rounded to the nearest thousand, this is also the functional currency of the company.

**1.9 Changes in accounting policy and disclosures****New and amended standards and interpretations**

The Company applied for the first time, certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2020. Their adoption has not had any material impact on the disclosures or on the amounts reported in these financial statements. The Company has not early adopted any other standard, interpretation or amendment that has been issued but not yet effective.

**Interest Rate Benchmark Reform - Amendments to IFRS 9, IAS 39 and IFRS 7**

In September 2019, the IASB issued amendments to IFRS 9, IAS 39 Financial Instruments: Recognition and Measurement and IFRS 7 Financial Instruments: Disclosures, which concludes phase one of its work to respond to the effects of Interbank Offered Rates (IBOR) reform on financial reporting. The amendments provide temporary reliefs which enable hedge accounting to continue during the period of uncertainty before the replacement of an existing interest rate benchmark with an alternative nearly risk-free interest rate (an RFR).

The amendments to IFRS 9 and IAS 39 Financial Instruments: Recognition and Measurement provide a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainty about the timing and/or amount of benchmark-based cash flows of the hedged item or the hedging instrument. These amendments have no impact on the financial statements of the Company as it does not have financial instruments that reference IBORs at 31 December 2021 or apply hedge accounting to any of its benchmark interest rate exposures.

**Definition of a Business - Amendments to IFRS 3**

The IASB issued amendments to the definition of a business in IFRS 3 Business Combinations to help entities determine whether an acquired set of activities and assets is a business or not. The amendments remove the assessment of whether market participants can replace any missing inputs or processes and continuing to produce outputs. The amendment clarifies the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test. The Company has adopted the amendments to IFRS 3 in the current year.

The amendments remove the assessment of whether market participants can replace any missing inputs or processes and continuing to produce outputs. The amendments are applied prospectively to all business combinations and asset acquisitions for which the acquisition date is on or after 1 January 2020. These amendments had no impact on the financial statements of the Company, but may impact future periods should the Company enter into any business combinations.

**Amendments to IAS 1 and IAS 8 Definition of material**

In October 2018, the IASB issued amendments to IAS 1 Presentation of Financial Statements and IAS 8 to align the definition of 'material' across the standards and to clarify certain aspects of the definition. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.'

The Company adopted the amendments to IAS 1 and IAS 8 for the first time last year. The amendments make the definition of material in IAS 1 easier to understand and are not intended to alter the underlying concept of materiality in IFRS Standards. The concept of 'obscuring' material information with immaterial information has been included as part of the new definition. The threshold for materiality influencing users has been changed from 'could influence' to 'could reasonably be expected to influence'. The definition of material in IAS 8 has been replaced by a reference to the definition of material in IAS 1. In addition, the IASB amended other Standards and the Conceptual Framework that contain a definition of 'material' or refer to the term 'material' to ensure consistency. These amendments had no impact on the financial statements of, nor is there expected to be any future impact to, the Company.

**The Conceptual Framework for Financial Reporting**

The revised Conceptual Framework for Financial Reporting (the Conceptual Framework) is not a standard, and none of the concepts override those in any standard or any requirements in a standard. The purpose of the Conceptual Framework is to assist the Board in developing standards, to help preparers develop consistent accounting policies if there is no applicable standard in place and to assist all parties to understand and interpret the standards.

The Company has adopted the amendments included in Amendments to References to the Conceptual Framework in IFRS Standards for the first time in the current year. The amendments include consequential amendments to affected Standards so that they refer to the new Framework. Not all amendments, however, update those pronouncements regarding references to and quotes from the Framework so that they refer to the revised Conceptual Framework. Some pronouncements are only updated to indicate which version of the Framework they are referencing to (the IASB Framework adopted by the IASB in 2001, the IASB Framework of 2010, or the new revised Framework of 2018) or to indicate that definitions in the Standard have not been updated with the new definitions developed in the revised Conceptual Framework. The Standards which are amended are IFRS 2, IFRS 3, IFRS 6, IFRS 14, IAS 1, IAS 8, IAS 34, IAS 37, IAS 38, IFRIC 12, IFRIC 19, IFRIC 20, IFRIC 22, and SIC-32. These amendments had no impact on the financial statements of the Company.

**Amendments to IFRS 16 Covid-19 Related Rent Concessions**

The IASB issued Covid-19-Related Rent Concessions (Amendment to IFRS 16) that provides practical relief to lessees in accounting for rent concessions occurring as a direct consequence of COVID-19, by introducing a practical expedient to IFRS 16. A lessee that makes this election shall account for any change in lease payments resulting from the COVID-19-related rent concession the same way it would account for the change applying IFRS 16 if the change were not a lease modification. The practical expedient applies only to rent concessions occurring as a direct consequence of COVID-19 and only if all of the following conditions are met:

- a) The change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;
- b) Any reduction in lease payments affects only payments originally due on or before 30 June 2021 (a rent concession meets this condition if it results in reduced lease payments on or before 30 June 2021 and increased lease payments that extend beyond 30 June 2021); and
- c) There is no substantive change to other terms and conditions of the lease in the current financial year. The company has not applied the amendment to IFRS 16 (as issued by the IASB in May 2020) as it did not receive any COVID-19 related rent concession on its lease.

**1.10 Summary of significant accounting policies****1.10. Introduction to summary of accounting policies**

The principal accounting policies applied in the preparation of these consolidated and separate financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

**(a) New and amended standards and interpretations not yet adopted by the Company**

Amendments to the following standard(s) became effective in the annual period starting from 1st January, 2019. The new reporting

requirements as a result of the amendments and/or clarifications have been evaluated and their impact or otherwise are noted below:

**IFRS 16 Leases**

The IASB issued the new standard for accounting for leases - IFRS 16 Leases in January 2016. The standard does not significantly change the accounting for leases for lessors. However it requires lessees to recognise most leases on their balance sheets as lease liabilities, with the corresponding right-of-use assets. Lessees must apply a single model for all recognised leases, but will have the option not to recognise 'short-term' leases and leases of 'low-value' assets. Generally, the profit or loss recognition pattern for recognised leases will be similar to today's finance lease accounting, with interest and depreciation expense recognised separately in the statement of profit or loss.

IFRS 16 became effective 1 January 2019. The company was not in any lease arrangement as at the quarter ended 30 September 2022.

**Amendments to IAS 19**

This amendment was issued 7 February 2018 and became effective 1 January 2019. It prescribes the accounting for all types of employee benefits except share-based payment, to which IFRS 2 applies. Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees or for the termination of employment. IAS 19 requires an entity to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when the entity consumes the economic benefit arising from the service provided by an employee in exchange for employee benefits.

The amendments clarify that:

- on amendment, curtailment or settlement of a defined benefit plan, a company now uses updated actuarial assumptions to determine its current service cost and net interest for the period; and
- the effect of the asset ceiling is disregarded when calculating the gain or loss on any settlement of the plan and is dealt with separately in other comprehensive income (OCI).

This amendment has no material impact on the company.

**IFRIC 23 - Uncertainty over Income Tax Treatments**

This standard which became effective 1 January 2019, clarifies the accounting for uncertainties in income taxes. The interpretation is to be applied to the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over tax treatments under IAS 12. The Company has considered the guidance included within the interpretation and concluded that the prescribed approach does not have a material impact on the company.

**Amendments to IFRS 2 - Share Based Payment - Classification and measurement of share based payment transactions**

This standard clarifies classification and measurement of share based payment transactions with net settlement features for withholding tax obligations (i.e. equity settled share based payment for employees and cash settled share based payment for withholding taxes). It grants an exemption to alleviate operational issues encountered in dividing the share based payment into cash-settled and equity-settled component. The amendments also clarify modifications to terms and conditions that change classifications from cash-settled to equity-settled as well as application of non-market vesting conditions and market non-vesting conditions. These amendments do not have any material impact on the company.

**Standards and interpretations issued/amended but not yet effective**

The company has not applied the following new or amended standards in preparing these consolidated and separate financial statements as it plans to adopt these standards at their respective effective dates. Commentaries on these new standards/amendments are provided below.

New or amended standards and effective date	Summary of the requirements
IFRS 17 Insurance Contracts	<p>IFRS 17 was issued in May 2017 as replacement to IFRS 4 Insurance Contracts. It requires a current measurement model where estimates are re-measured in each reporting period. Contracts are measured using the building blocks of:</p> <ul style="list-style-type: none"> <li>- discounted probability-weighted cash flows</li> <li>- an explicit risk adjustment, and</li> <li>- a contractual service margin (CSM) representing the unearned profit of the contract which is recognised as revenue over the coverage period.</li> </ul> <p>The standard allows a choice between recognising changes in discount rates either in the statement of profit or loss or directly in other comprehensive income. The choice is likely to reflect how insurers account for their financial assets under IFRS 9.</p> <p>An optional, simplified premium allocation approach is permitted for the liability for the remaining coverage for short duration contracts, which are often written by non-life insurers.</p> <p>"There is a modification of the general measurement model called the 'variable fee approach' for certain contracts written by life insurers where policyholders share in the returns from underlying items. When applying the variable fee approach, the entity's share of the fair value changes of the underlying items is included in the CSM. The results of insurers using this model are therefore likely to be less volatile than under the general model.</p> <p>The new rules will affect the financial statements and key performance indicators of all entities that issue insurance contracts or investment contracts with discretionary participation features.</p> <p>At its March 2020 meeting, the IASB tentatively decided to defer the effective date of IFRS 17 by two years, such that entities would apply the amended Standard for annual periods beginning on or after January 1, 2023. The IASB also tentatively decided on a consequential amendment to IFRS 4 Insurance Contracts to defer the fixed expiry date for the temporary exemption from applying IFRS 9 Financial Instruments, so that entities would be required to apply IFRS 9 for annual periods beginning on or after January 1, 2023. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17."</p>
<p>Amendments to IAS 1: Classification of Liabilities as Current or Non-current</p>	<p>"In January 2020, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:</p> <ul style="list-style-type: none"> <li>- What is meant by a right to defer settlement</li> <li>- That a right to defer must exist at the end of the reporting period</li> <li>- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification</li> <li>- That classification is unaffected by the likelihood that an entity will exercise its deferral right.</li> </ul> <p>- that the reference to obscuring information addresses situations in which the effect is similar to omitting or misstating that information, and that an entity assesses materiality in the context of the financial statements as a whole, and</p> <ul style="list-style-type: none"> <li>- the meaning of 'primary users of general purpose financial statements' to whom those financial statements are directed, by defining them as 'existing and potential investors, lenders and other creditors' that must rely on general purpose financial statements for much of the financial information they need.</li> </ul> <p>the amendments are effective for annual reporting periods beginning on or after 1 January 2023 and must be applied retrospectively.</p>
Reference to the Conceptual Framework - Amendments to IFRS 3	<p>In May 2020, the IASB issued Amendments to IFRS 3 Business Combinations - Reference to the Conceptual Framework. The amendments are intended to replace a reference to the Framework for the Preparation and Presentation of Financial Statements, issued in 1989, with a reference to the Conceptual Framework issued in March 2018 without significantly changing its requirements.</p> <p>The Board also added an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 or IFRIC 21 Levies, if incurred separately. At the same time, the Board decided to clarify existing guidance in IFRS 3 for contingent assets that would not be affected by replacing the reference to the Framework for the Preparation and Presentation of Financial Statements. The amendments are effective for annual reporting periods beginning on or after 1 January 2022 and apply prospectively.</p>
Property, Plant and Equipment: Proceeds before Intended Use - Amendments to IAS 16	<p>In May 2020, the IASB issued Property, Plant and Equipment – Proceeds before Intended Use, which prohibits entities from deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items, in profit or loss.</p> <p>The amendment is effective for annual reporting periods beginning on or after 1 January 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.</p>

Onerous Contracts - Costs of Fulfilling a Contract - Amendments to IAS 37	<p>In May 2020, the IASB issued amendments to IAS 37 to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.</p> <p>The amendments apply a “directly related cost approach”. The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities. General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.</p> <p>The amendments are effective for annual reporting periods beginning on or after 1 January 2022. The Company will apply these amendments to contracts for which it has not yet fulfilled all its obligations at the beginning of the annual reporting period in which it first applies the amendments.</p>
IFRS 1 First-time Adoption of International Financial Reporting Standards - Subsidiary as a first-time adopter	<p>IFRS 1 First-time Adoption of International Financial Reporting Standards - Subsidiary as a first-time adopter. As part of its 2018-2020 annual improvements to IFRS standards process, the IASB issued an amendment to IFRS 1 First-time Adoption of International Financial Reporting Standards. The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent’s date of transition to IFRS. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of IFRS 1.</p> <p>The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted.</p>
IAS 41 Agriculture - Taxation in fair value measurements	<p>As part of its 2018-2020 annual improvements to IFRS standards process, the IASB issued amendment to IAS 41 Agriculture. The amendment removes the requirement in paragraph 22 of IAS 41 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of IAS 41.</p> <p>An entity applies the amendment prospectively to fair value measurements on or after the beginning of the first annual reporting period beginning on or after 1 January 2022 with earlier adoption permitted.</p>
IFRS 9 Financial Instruments - Fees in the ‘10 per cent’ test for derecognition of financial liabilities	<p>As part of its 2018-2020 annual improvements to IFRS standards process the IASB issued amendment to IFRS 9. The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received by the borrower and the lender, including fees paid or received by either the borrower or lender on the other’s behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.</p> <p>The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted. The Company will apply the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.</p>
Amendments to IFRS 3: Covid-19 Related Rent Concessions	<p>On 28 May 2020, the IASB issued Covid-19-Related Rent Concessions - amendment to IFRS 16 Leases. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. The amendment applies to annual reporting periods beginning on or after 1 June 2020. Earlier application is permitted. This amendment had no impact on the financial statements of the Company.</p>
Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - Amendments to IFRS 10 and IAS 28	<p>The amendments address the conflict between IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognised when a transfer to an associate or joint venture involves a business as defined in IFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognised only to the extent of unrelated investors’ interests in the associate or joint venture.</p> <p>The amendments are intended to eliminate diversity in practice and give preparers a consistent set of principles to apply for such transactions. However, the application of the definition of a business is judgmental and entities need to consider the definition carefully in such transactions.</p> <p>The amendments must be applied prospectively. Early application is permitted and must be disclosed.</p> <p>In December 2015, the IASB decided to defer the effective date of the amendments until such time as it has finalised any amendments that result from its research project on the equity method. Early application of the amendments is still permitted.</p>

<p>Interest Rate Benchmark Reform - Phase 2 - Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16</p>	<p>On 27 August 2020, the IASB published Interest Rate Benchmark Reform - Phase 2, Amendments to IFRS 9 Financial Instruments (IFRS 9), IAS 39 Financial Instruments: Recognition and Measurement (IAS 39), IFRS 7 Financial Instruments: Disclosures (IFRS 7), IFRS 4 Insurance Contracts (IFRS 4) and IFRS 16 Leases (IFRS 16). With publication of the phase two amendments, the IASB has completed its work in response to IBOR reform. The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR).</p> <p>The amendments include a practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest. Inherent in allowing the use of this practical expedient is the requirement that the transition from an IBOR benchmark rate to an RFR takes place on an economically equivalent basis with no value transfer having occurred.<sup>2</sup></p> <p>"Any other changes made at the same time, such as a change in the credit spread or maturity date, are assessed. If they are substantial, the instrument is derecognised. If they are not substantial, the updated effective interest rate (EIR) is used to recalculate the carrying amount of the financial instrument, with any modification gain or loss recognised in profit or loss.</p> <p>The practical expedient is required for entities applying IFRS 4 Insurance Contracts that are using the exemption from IFRS 9 Financial Instruments (and, therefore, apply IAS 39 Financial Instruments: Classification and Measurement) and for IFRS 16 Leases, to lease modifications required by IBOR reform.</p> <p>The amendments permit changes required by IBOR reform to be made to hedge designations and hedge documentation without the hedging relationship being discontinued. Permitted changes include redefining the hedged risk to reference an RFR and redefining the description of the hedging instruments and/or the hedged items to reflect the RFR. Entities are allowed until the end of the reporting period, during which a modification required by IBOR reform is made, to complete the changes. Any gains or losses that could arise on transition are dealt with through the normal requirements of IFRS 9 and IAS 39 to measure and recognise hedge ineffectiveness.</p> <p>Amounts accumulated in the cash flow hedge reserve are deemed to be based on the RFR. The cash flow hedge reserve is released to profit or loss in the same period or periods in which the hedged cash flows based on the RFR affect profit or loss. For the IAS 39 assessment of retrospective hedge effectiveness, on transition to an RFR, entities may elect on a hedge-by-hedge basis, to reset the cumulative fair value changes to zero. This relief applies when the exception to the retrospective assessment ends.</p> <p>For the IAS 39 assessment of retrospective hedge effectiveness, on transition to an RFR, entities may elect on a hedge-by-hedge basis, to reset the cumulative fair value changes to zero. This relief applies when the exception to the retrospective assessment ends. The amendments provide relief for items within a designated company of items (such as those forming part of a macro cash flow hedging strategy) that are amended for modifications directly required by IBOR reform. The reliefs allow the hedging strategy to remain and not be discontinued.</p> <p>As items within the hedged company transition at different times from IBORs to RFRs, they will be transferred to sub-companys of instruments that reference RFRs as the hedged risk. As instruments transition to RFRs, a hedging relationship may need to be modified more than once. The phase two reliefs apply each time a hedging relationship is modified as a direct result of IBOR reform. The phase two reliefs cease to apply once all changes have been made to financial instruments and hedging relationships, as required by IBOR reform.</p> <p>The amendments provide temporary relief to entities from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component. The relief allows entities upon designation of the hedge, to assume that the separately identifiable requirement is met, provided the entity reasonably expects the RFR risk component to become separately identifiable within the next 24 months.</p> <p>Hedging relationships must be reinstated if the hedging relationship was discontinued solely due to changes required by IBOR reform and it would not have been discontinued if the phase two amendments had been applied at that time. While application is retrospective, an entity is not required to restate prior periods.</p> <p>IFRS 7 Financial Instruments: Disclosures includes the following:</p> <ul style="list-style-type: none"> <li>- How the entity is managing the transition to RFRs, its progress and the risks to which it is exposed arising from financial instruments due to IBOR reform</li> <li>- Disaggregated by each significant IBOR benchmark, quantitative information about financial instruments that have yet to transition to RFRs</li> <li>- If IBOR reform has given rise to changes in the entity's risk management strategy, a description of these changes.</li> </ul>
--	--

**1.11 Presentation of financial statements**

The company presents its statements of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within twelve months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in the Notes.

**2 Summary of Significant Accounting Policies**

The principal accounting policies adopted in the preparation of these consolidated and separate financial statements are set out below. These policies have been consistently applied to all years presented unless otherwise stated.

**2.1 Foreign currencies**

On initial recognition, all transactions are recorded in the functional currency (the currency of the primary economic environment in which the company operates or transact business), which is Nigerian Naira. Transactions in foreign currencies during the year are converted into the functional currency using the exchange rate prevailing at the transaction date.

Monetary assets and liabilities at the statement of financial position date denominated in foreign currencies are translated into the functional currency using the exchange rate prevailing as at that date. The resulting foreign exchange gains and losses from the settlement of such transactions and from year-end translation are recognised on a net basis in the income statements in the year in which they arise, except for difference arising on translation of non-monetary available-for-sale financial assets, which are recognised in other comprehensive income.

**2.2 Segment reporting**

A segment is a distinguishable component of the company that is engaged either in providing related products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

An operating segment is a component of an entity:

- That engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity).

- Whose operating results are regularly reviewed by the entity's chief operating decision maker to make decision about resources to be allocated to the segment and assess its performance of the same entity)

- For which discrete financial information is available.

An operating segment may engage in business activities for which it has yet to earn revenues for example startup operations may be operating segments before earning revenues.

The Company currently operates a single line of business and entirely within a geographical region.

**2.3 Cash and cash equivalents**

Cash and cash equivalents comprise cash on hand and demand deposits, together with other short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value. Cash equivalents have a maturity period of less than or equal to three months.

**2.4 Financial instruments****Initial recognition and measurement**

Financial instruments are recognised initially when the Company becomes a party to the contractual provisions of the instrument.

All financial instruments are measured initially at their fair value plus transaction costs, except in the case of financial assets and financial liabilities recorded at fair value through profit or loss where transaction cost are expensed in the income statement.

The Company classifies financial instruments or their components parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual agreement. Classification depends on the purpose for which the financial instruments were obtained or incurred and takes place at initial recognition. Classification is re-assessed on annual basis.

Regular-way purchases and sales of financial assets are recognised on settlement date which is the date on which the Company commits to purchase or sell the asset. Financial instruments are initially measured at fair value plus transaction costs for all financial assets not carried at fair value through profit and loss. These transaction costs are expensed in the income statement.

**Measurement and recognition of expected credit losses**

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for financial guarantee contracts, the exposure includes the amount drawn down as at the reporting date, together with any additional amounts expected to be drawn down in the future by default date determined based on historical trend, the company's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information. For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the company in accordance with the contract and all the cash flows that the company expects to receive, discounted at the original effective interest rate. For a lease receivable, the cash flows used for determining the expected credit losses is consistent with the cash flows used in measuring the lease receivable in accordance with IAS 17 Leases.

For a financial guarantee contract, as the company is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed, the expected loss allowance is the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the company expects to receive from the holder, the debtor or any other party.

If the company has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the company measures the loss allowance at an amount equal to 12-month ECL at the current reporting date, except for assets for which simplified approach was used. The company recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognised in other comprehensive income and accumulated in the investment revaluation reserve, and does not reduce the carrying amount of the financial asset in the statement of financial position.

**Derecognition of financial instruments**

Previously recognised financial assets are derecognised when either the contractual rights to receive the cash flows from these assets have ceased to exist or the assets expire or the Company transfers the assets such that the transfer qualifies for derecognition. The decision as to whether a transfer qualifies for derecognition is made by applying a combination of risks, rewards and control tests.

Collateral (shares and bonds) furnished by the Company under standard repurchase agreements and securities lending and borrowing transactions is not derecognised because the Company retains substantially all the risks and rewards on the basis of the predetermined repurchase price, and the criteria for derecognition are therefore not met.

Financial assets that are transferred to a third party but do not qualify for derecognition are presented in the statement of financial position as pledged assets, if the transferee has the right to sell or repledge them.

Derecognition of a financial liability occurs only when the obligation is extinguished. A financial liability is said to be extinguished when the obligation is discharged, cancelled or expired.

**Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

**Hedge Accounting**

The new general hedge accounting requirements retain the three types of hedge accounting mechanisms currently available in IAS 39. Under IFRS 9, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about a Company's risk management activities have also been introduced.

**Financial assets****a) Classification and subsequent measurement**

For the purpose of measuring a financial asset after initial recognition, IFRS 9 classifies financial assets into the following categories: at fair value through profit or loss; at fair value through other comprehensive income and at amortised cost. The classification is based on the results of the Company's business model test and the contractual cashflow characteristics of the financial assets. The category relevant to the company as at 31 December 2019 are fair value through profit or loss; at fair value through other comprehensive income and at amortised cost. At initial recognition all assets are measured at Fair Value.

**i) Financial assets at fair value through profit or loss**

Financial assets at fair value through profit or loss are financial assets held for trading and those designated by the Company as at fair value through profit or loss upon initial recognition. Financial assets classified as held through profit or loss are those that have been acquired principally for the purpose of selling in the short term or repurchasing in the near term, or held as part of a portfolio that is managed together for short-term profit.

Financial instruments included in this category are recognised initially at fair value; transaction costs are taken directly to profit or loss. Gains and losses arising from changes in fair value are included directly in profit or loss and are reported as 'Net gains/(losses) on financial assets classified as held for trading'. Interest income and expense and dividend income on financial assets held for trading are included in 'Discount and similar income' or 'Other operating income', respectively. Fair value changes relating to financial assets designated at fair value through profit or loss are recognised in 'Net gains from financial assets held for trading'.

**ii) Amortised Cost**

Except for financial assets that are designated at initial recognition as at fair value through profit or loss a financial asset is measured at amortised cost only if both of the following conditions are met:

- a. the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows (the business model test) and
- b. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (the contractual cash flows characteristics test).

If a financial asset satisfies both of these conditions, it is required to be measured at amortised cost unless it is designated as at fair value through profit or loss (FVTPL) on initial recognition

**iii) Fair Value through other comprehensive income (FVTOCI)**

Except for financial assets that are designated at initial recognition as at fair value through profit or loss, a financial asset is measured at fair value through other comprehensive income (FVTOCI) if both of the following conditions are met:

- a. the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets (the business model test); and
- b. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (the contractual cash flows characteristics test).

**b) Impairment of financial assets**

The impairment model under IFRS 9 reflects expected credit losses, as opposed to incurred credit losses under IAS 39. Under the impairment approach in IFRS 9, it is no longer necessary for a credit event to have occurred before credit losses are recognised. Instead, a Company always accounts for expected credit losses and changes in those expected credit losses. The amount of expected credit losses should be updated at each reporting date to reflect changes in credit risk since initial recognition.

The Company recognizes loss allowances for Expected Credit Losses (ECL) on the following financial instruments that are not measured at FVTPL:

Financial assets that are debt instruments, Lease receivables, Loan and advances to customers, Other Loans and receivables, Financial guarantee contracts issued; and Loan commitments issued. The Company measures expected credit losses and recognizes interest income on risk assets based on the following stages:

Stage 1: Assets that are performing. If credit risk is low as of the reporting date or the credit risk has not increased significantly since initial recognition, the Company recognize a loss allowance at an amount equal to 12-month expected credit losses. This amount of credit losses is intended to represent lifetime expected credit losses that will result if a default occurs in the 12 months after the reporting date, weighted by the probability of that default occurring.

Stage 2: Assets that have significant increases in credit risk. In instances where credit risk has increased significantly since initial recognition, the Company measures a loss allowance at an amount equal to full lifetime expected credit losses. That is, the expected credit losses that result from all possible default events over the life of the financial instrument. For these debt instruments, interest income recognition will be based on the EIR multiplied by the gross carrying amount.

Stage 3: Credit impaired. For debt instruments that have both a significant increase in credit risk plus observable evidence of impairment .

The Company's process to assess changes in credit risk is multi-factor and has three main elements;

- I. Quantitative element , a quantitative comparison of PD at the reporting date and PD at initial recognition
- II. Qualitative elements
- III. Backstop indicators

For individually significant exposures such as corporate and commercial risk assets, the assessment is driven by the internal credit rating of the exposure and a combination of forward-looking information that is specific to the individual borrower and forward-looking information on the macro economy, commercial sector (to the extent such information has not been already reflected in the rating process).

For other exposures, significant increases in credit risk is made on a collective basis that incorporates all relevant credit information, including forward-looking macroeconomic information. For this purpose, the Company companies its exposures on the basis of shared credit risk characteristics.

#### **Significant increase in credit risk**

The Company decision on whether expected credit losses are based on 12-month expected credit losses or lifetime expected credit losses depends on whether there has been a significant increase in credit risk since initial recognition. An assessment of whether credit risk has increased significantly is made at each reporting date. When making the assessment, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. This forms the basis of stage 1, 2 and 3 classification and subsequent migration.

The Company applies qualitative and quantitative criteria for stage classification and for its forward and backward migration

#### **i) Assets carried at amortised cost**

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in income statement. If a financial instrument has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from disposal less costs for obtaining and selling the collateral, whether or not disposal is probable.

For the purposes of a collective evaluation of impairment, financial assets are companyed on the basis of similar credit risk characteristics (i.e. on the basis of the Company's grading process that considers asset type, industry, geographical location, collateral type, past-due status and other relevant factors). Those characteristics are relevant to the estimation of future cash flows for companies of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a company of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the company and historical loss experience for assets with credit risk characteristics similar to those in the company. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist.

Estimates of changes in future cash flows for companies of assets are reflected and directionally consistent with changes in related observable data from period to period (for example, changes in unemployment rates, property prices, payment status, or other factors indicative of changes in the probability of losses in the company and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Company to reduce any differences between loss estimates and actual loss experience.

When a loan is uncollectible, it is written off against the related allowance for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Impairment charges relating to loans and advances to banks and loans and advances to customers are classified in 'impairment charge for credit losses' whilst impairment charges relating to investment securities (loans and receivables categories) are classified in 'Net gains/(losses) on investment securities'.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in profit or loss.

#### ii) Assets classified as fair value through other comprehensive income

The Company can choose to make an irrevocable election at initial recognition for investments in equity instruments that do not meet the definition of held for trading, which would otherwise be measured at fair value through profit or loss, to present changes in fair value in other comprehensive income.

Reclassification of amounts recognised in other comprehensive income and accumulated in equity to profit or loss is not done. This applies throughout the life of the instrument and also at derecognition; such investments will not be subject to the impairment requirements. Dividends on investments in equity instruments with gains and losses irrevocably presented in other comprehensive income are recognised in profit or loss if the dividend is not a return on investment (like dividends on any other holdings of equity instrument) when:

- the Company's right to receive payment of the dividend is established;
- it is probable that the economic benefits associated with the dividend will flow to the Company; and
- the amount of the dividend can be measured reliably.

For debt instruments measured at FVTOCI, changes in fair value is recognised in other comprehensive income, except for: interest calculated using the effective interest rate method, foreign exchange gains or losses and; impairment gains or losses until the financial asset is derecognised or reclassified.

When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. Also, when a debt instrument asset is measured at fair value through other comprehensive income, the amounts that are recognised in profit or loss are the same as the amounts that would have been recognised in profit or loss if the financial asset had been measured at amortised cost.

#### c) Reclassification of financial assets

Reclassification of financial assets is determined by the Company's senior management, and is done as a result of external or internal changes which are significant to the Company's operations and demonstrable to external parties.

Reclassification of financial assets occurs when the Company changes its business model for managing financial assets.

Investments in equity instruments that are designated as at FVTOCI at initial recognition cannot be reclassified because the election to designate as at FVTOCI is irrevocable.

## STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

## Financial liabilities

## Classification and subsequent measurement

The Company's holding in financial liabilities represents mainly Insurance Contract Liabilities, 'trade payables' and 'other liabilities'. These are all classified as financial liabilities measured at amortised cost. These financial liabilities are initially recognised at fair value and subsequently measured at amortised cost. Any difference between the proceeds net of transaction costs and the redemption value is recognised in the income statement over the period of the borrowing using the effective interest rate method.

Fees paid on the establishment of the liabilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent that there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

The classification of the Company's financial instruments have been summarised in the table below:

Category		Classes as determined by The Company		Subclasses
	Financial assets at fair value through profit or loss	Listed Securities		Quoted Equities
	Amortized cost	Cash and balances with Central bank of Nigeria		Cash
				Statutory deposit with CBN
				Current account balances
				Placements
		Loans and advances to customers		FGN Treasury Bills
				Staff loans
		Investment securities	Listed debt	Corporate bonds
		Other assets		Fees receivable
				Intercompany receivable
				Other receivables
Financial liabilities	Fair value through other comprehensive income	Listed Securities		Quoted Equities
				Unquoted Equities
		Unlisted securities		
	Financial liabilities at amortised cost	Insurance contract liabilities		Accruals
				Payables
		Trade payables		Other creditors
				Outstanding claims
	Other liabilities			Unearned premiums

## Measurement

All financial instruments are measured initially at their fair value plus transaction costs, except in the case of financial assets and financial liabilities recorded at fair value through profit or loss where transaction cost are expensed in the income statement.

## Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

## Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date

At initial recognition, the best evidence of the fair value of a financial instrument is the transaction price (i.e. the fair value of the consideration paid or received), unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument, without modification or repackaging, or based on valuation techniques such as discounted cash flow models and option pricing models whose variables include only data from observable markets.

Subsequent to initial recognition, for financial instruments traded in active markets, the determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer price quotations. This includes listed equity securities and quoted debt instruments on major exchanges (for example, Nigerian Stock Exchange (NSE) and Financial Markets Dealers Quotation (FMDQ)).

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry company, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indications that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions.

**STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES**

For all other financial instruments, fair value is determined using valuation techniques. In these techniques, fair values are estimated from observable data in respect of similar financial instruments, using models to estimate the present value of expected future cash flows or other valuation techniques, using inputs existing at the dates of the statement of financial position.

**Forward-Looking Information**

In the context of IFRS 9, is an enhanced information set that includes credit information pertaining to future developments (including for example macroeconomic developments). The inclusion of forward-looking information along with traditional past due (realized, historical) information is considered to produce comprehensive credit risk information.

The inclusion of forward-looking information is a distinctive feature of an IFRS 9 ECL model. Incorporating economically stressed states of the world and their potential impact on credit performance is critical for the timely recognition of credit losses.

**2.5 Trade/Pension receivables**

Receivables are recognised when due. These include amounts due from agents, brokers and insurance contract holders.

If there is objective evidence that the insurance receivable is impaired, the company reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in the income statement. The company gathers the objective evidence that an insurance receivables impaired using the same methodology adopted for fiancnail assets held at amortised cost. the impairment loss is calculated under the same method used for these financial assets.

**2.6 Reinsurance**

The company cedes insurance risk in the normal course of business for all of its businesses.

**2.6.1 Reinsurance assets**

Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision or settled claims or insurance contract liabilities associated with the reinsurers policies and are in accordance with the related reinsurance contract. Reinsurance assets are reviewed for impairment at each reporting date or more frequently when an indication of impairment arises during the reporting year. Impairment occurs when there is objective evidence as a result of an event that occurred after initial recognition of the reinsurance asset that the company may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the company will receive from the reinsurer. The impairment loss recorded in the statement of profit or loss and other comprehensive income.

Gains or losses on buying reinsurance are recognised in the income statement immediately at the date of purchase and are not amortised. Ceded reinsurance arrangements do not relieve the company from its obligation to policy holders.

**2.6.2 Reinsurance Liabilities**

Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due. The company has the right to set-off re-insurance payables against amount due from re-insurance and brokers in line with the agreed arrangement between both parties.

**2.7 Deferred Policy Acquisition Costs (DAC)**

Acquisition cost comprise all direct and indirect costs arising from the writing of non-life insurance contracts. Deferred acquisition costs represent a proportion of commission which are incurred during a financial year and are deferred to the extent that they are recoverable out of future revenue margins. It is calculated by applying to the acquisition expenses that ratio of unearned premium to written premium.

**2.8 Prepayment**

prepayments are carried at cost less accumulated impairment losses.

**2.9 Consolidation****2.9.1 Subsidiaries**

The financial statements of subsidiaries are consolidated from the date the company acquires control, up to the date that such effective control ceases. For the purpose of these financial statements, subsidiaries are entities over which the company, directly or indirectly, has the power to govern the financial and operating policies so as to obtain benefits from their activities.

Changes in the company's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions (transactions with owners). Any difference between the amount by which the non-controlling interest is adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the company.

Inter-company transactions, balances and unrealised gains on transactions between companies within the company are eliminated on consolidation. Unrealised losses are also eliminated in the same manner as unrealised gains, but only to the extent that there is no evidence of impairment.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the company. Investment in subsidiaries in the separate financial statements of the parent entity is measured at cost.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, fair value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date through profit or loss.

**2.9. 1a Disposal of Subsidiaries**

On loss of control, the company derecognizes the assets and liabilities of the subsidiary, any controlling interest and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in profit or loss. If the company retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently, that retained interest is accounted for as equity accounted investee or as an available-for-sale financial asset depending on the level of influence retained.

**2.9.2 Investment in Associates**

As associate is an entity over which the company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with IFRS 5 - Noncurrent Asset Held for Sale and Discontinued Operations. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognize the company's share of the profit or loss and other comprehensive income of the associate. when the company's share of losses of an associate exceeds the company's interest in that associate (which includes any long-term interest that, in substance, form part of the company's net investment in the associate), the company discontinues recognizing its share of further losses. Additional losses are recognised only to the extent that the company has incurred legal or constructive obligations or made payments on behalf of the associate.

Any excess of the cost of acquisition over the company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an associate recognised at the date of acquisition is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognised immediately in profit or loss.

The requirements of IAS 36 are applied to determine whether it is necessary to recognize any impairment loss with respect to the company's investment in an associate. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 Impairment of Assets as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When a company entity transacts with its associate, profits and losses resulting from the transactions with the associate are recognised in the company's consolidated financial statements only to the extent of interests in the associate that are not related to the company.

**2.10 Investment Properties**

Investment property is property held on earn rentals or for capital appreciation or both. Investment property, including interest in leasehold land, is initially recognised at cost including the transaction costs. Subsequently, investment property is accried at fair value representing the open market value at the statement of financial position date determined by annual valuation carried out by external registered valuers. gains or losses arising from changes in the fair value are included in determining the profit or loss for the year to which they relate.

Investment properties are derecognized when either they have been disposed off or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. On disposal of an investment property, the difference between the disposal proceeds and the carrying amount is charged or credited to profit or loss.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the company accounts for such property in accordance with the policy stated under property and equipment up to the date of the change in use

When the company completes the construction or development of a self-constructed investment property, any difference between the fair value of the property at that date and its previous carrying amount is recognised in the income statement.

**2.11 Intangible Assets**

Software license costs and computer software that is not an integral part of the related hardware are initially recognised at cost, and subsequently carried at cost less accumulated amortization and accumulated impairment losses. Costs that are directly attributable to the production of identifiable computer software products controlled by the company are recognised as intangible assets.

Amortization is calculated using the straight line method to write down the cost of each license or item of software to its residual value over its estimated useful life.

Amortization begins when the asset is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management, even when idle. Amortization ceases at the earlier date that the asset is classified as held for sale and the date that the asset is derecognized and ceases temporarily, while the residual value exceeds or is equal to the carrying value.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the income statement when the asset is derecognized.

Intangibles recognised as assets are amortized over their useful lives, which does not exceed five years.

**2.12 Goodwill**

Goodwill arising on an acquisition of a business is acquired at cost as established at the date of acquisition of the business (see 4.9 above) less accumulated impairment losses, if any. For the purposes of impairment testing, goodwill is allocated to each of the company's cash generating units (or companies of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each in the unit. Any impairment loss for goodwill is recognised directly in profit or loss in the consolidated (statement of comprehensive income/income statement). An impairment loss recognised for goodwill is not reversed in subsequent periods. On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

The company's policy for goodwill arising on the acquisition of an associate is described at 2.9.2 above.

**2.13 Property, Plant and Equipment**

All categories of property and equipment are initially recognised at cost. Cost includes expenditure directly attributable to the acquisition of the assets. Computer software, including the operating system that is an integral part of the related hardware is capitalized as part of the computer equipment.

Work in progress owner-occupied property that are included in property, plant and equipment are stated at cost to date and are not yet decommissioned as the asset has not been put into use.

Subsequent cost are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. Repairs and maintenance expenses are charged to the income statement in the year in which they are incurred.

Increases in the carrying amount arising on revaluation are recognised in other comprehensive income and accumulated in equity under the heading of revaluation surplus. Decreases that offset previous increases of the same asset are recognised in other comprehensive income. All other decreases are charged to the statement of profit or loss.

Freehold land is not depreciated. Depreciation is calculated using the straight line method to write down the cost or the revalued amount of each asset to its residual value over its estimated useful life using the following annual rates:

Leasehold land	0%	Over the lease period
Buildings	2%	2%
Furniture & Fittings	20%	20%
Office Equipment	20%	20%
Computer Equipment	20%	20%
Plant & Equipment	20%	20%
Motor Vehicles	25%	25%

Depreciation on an item of property, plant and equipment commences when it is available for use and continues to depreciate until it is derecognized, even if during that period the item is idle. Depreciation of an item ceases when the item is retired from active use and is being held for disposal.

Where no parts of items of property, plant and equipment have a cost that is significant in relation to the total cost of the item, the same rate of depreciation is applied to the whole item.

The assets' residual values, depreciation method and useful lives are reviewed, and adjusted if appropriate, at each statement of financial position date.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal.

Gains and losses on disposal of property and equipment are determined by reference to their carrying amounts and are taken into account in determining operating profit.

**2.14 Statutory Deposits**

Statutory Deposit represents 10% of the paid up capital of the Company deposited with the Central Bank of Nigeria (CBN) pursuant to Section 10(3) of the Insurance Act 2003.

Statutory deposit is measured at cost.

**2.15 Insurance Contract Liabilities**

Contract that are classified as insurance contracts are those under which the company underwrites significant insurance risk from another party (the broker or insured) by agreeing to compensate the insured or other beneficiary if a fortuitous random event (the insured event) adversely affects the policyholder or other beneficiary.

**2.15.1 Types of Insurance Contracts**

Insurance contract may be non-life or life. The company issues only non-life insurance contracts. Non-life insurance contracts are accident, casualty and property insurance contracts.

Accident and casualty insurance contracts protect the company's customers against the risk of causing harm to third parties as result of their legitimate activities. Damages covered include both contractual and non-contractual events. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and for individual and business customers who become liable to pay compensation to a third party for bodily harm or property damage (public liability).

Property insurance contracts mainly compensate the company's customers for damage suffered to their properties or for the value of property lost. Customers who undertake commercial activities on their premises could also receive compensation for the loss of earnings caused by the inability to use the insured properties in their business activities (business interruption cover).

Non-life insurance contracts protect the company's customers from the consequences of events (such as death or disability) that would affect the ability of the customer or his/her dependants to maintain their current level of income. Guaranteed benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the policy holder. There are no maturity or surrender benefits.

#### 2.15.2 Recognition and measurement of non-life insurance contracts

a. For all non-life insurance contract, premiums are recognised as revenue (earned premiums) proportionally over the period of coverage. The portion of premium received on in-force contracts that relates to unexpired risks at the balance sheet date is reported as the unearned premium liability. Premiums are shown before deduction of commission.

Claims and loss adjustment expenses are charged to income as incurred based on the estimated liability for compensation owed to contract holders or third parties damaged by the contract holders. They include direct and indirect claims settlement costs and arise from events that have occurred up to the end of the reporting period even if they have not yet been reported to the company. The company does not discount its liabilities for unpaid claims.

Liabilities for unpaid claims are estimated using the input of assessments for individual cases reported to the company and statistical analyses for the claims incurred but not reported, and to estimate the expected ultimate cost of more complex claims that may be affected by external factors (such as court decisions).

##### b. Salvages

Some non-life insurance contracts permit the company to sell (usually damaged) property acquired in the process of settling a claim. The company may also have the right to pursue third parties for payment of some or all costs of damages to its client's property (i.e. subrogation right).

Salvage recoveries are used to reduce the claim expense when the claim is settled.

##### c. Subrogation

Subrogation is the right for an insurer to pursue a third party that caused an insurance loss to the insured. This is done as a means of recovering the amount of the claim paid to the insured for the loss. A receivable for subrogation is recognized in other assets when the liability is settled and the company has the right to receive future cash flow from the third party.

##### d. Deferred Income

Deferred Income represents a proportion of commission received on reinsurance contracts which are booked during a financial year and are deferred to the extent that they are recoverable out of future revenue margins. It is calculated by applying to the reinsurance commission income the ratio of prepaid reinsurance to reinsurance cost.

##### e. Reinsurance Contracts held

Contracts entered into by the company with reinsurers under which the company is compensated for losses on one or more contracts issued by the company and that meet the classification requirements for insurance contracts are classified as reinsurance contracts held. Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the company under which the contract holder is another insurer (inwards reinsurance) are included with insurance contracts.

##### f. Technical Reserves

These are computed in accordance with the provisions of section 22 of the Insurance Act 2003 as follows:

\* Reserve for unearned premium: In compliance with Section 20(i) (a) of Insurance Act 2003, the reserve for unearned premium is calculated on a time apportionment basis in respect of the risks accepted during the year.

\* Reserve for outstanding claims: The reserve for outstanding claims is maintained at the total amount of outstanding claims incurred and reported plus claims incurred but not reported ("IBNR") as at the balance sheet date. The IBNR is based on the liability adequacy test.

##### g. Liability Adequacy Test

At each end of the reporting period, liability adequacy tests are performed by an Actuary to ensure the adequacy of the contract liabilities net of related DAC assets. In performing these tests, current best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities, are used. Any deficiency is immediately charged to profit or loss initially by writing off DAC and by subsequently establishing a provision for losses arising from liability adequacy tests "the unexpired risk provision".

The provisions of the Insurance Act 2003 require an actuarial valuation for life insurance reserves only. However, IFRS 4 requires a liability adequacy test for both life and non-life insurance reserves. The provision of section 59 of the Financial Reporting Council Act 2011 gives superiority to the provision of IFRS and since it results in a more conservative reserving than the provision of the Insurance Act 2003, it serves the company's prudential concerns well.

#### 2.16 Trade and other Payables

Trade and other payables are recognised initially at fair value and subsequently measured at amortized cost using the effective interest method. The fair value of a non-interest bearing liability is its discounted repayment amount. If the due date of the liability is less than one year discounting is omitted.

**2.17 Retirement Benefit Obligations****Pension Cost**

The company operates a defined contributory retirement benefit scheme as stipulated in the Pension Reform Act 2014. Under the defined contribution scheme, the company pays fixed contributions of 10% of emoluments as defined by the Act to Pension Fund Administrators; employees also pay a fixed percentage of 8% to the same entity. Once the contributions have been paid, the company retains no legal or constructive obligation to pay further contribution if the fund does not hold sufficient assets to finance benefits accruing under the retirement benefit plan.

**2.18 Provisions**

General Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the company expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the income statement net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

**2.19 Current Income Tax**

Current income tax is the amount of income tax payable on the taxable profit for the year determined in accordance with the Nigeria Income Tax Act. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as at the reporting date.

**2.19.1 Deferred Income Tax**

Deferred income tax is provided in full on all temporary differences except those arising on the initial recognition of an asset or liability.

Deferred income tax is determined using the liability method on all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes, using tax rates and laws enacted or substantively enacted at the statement of financial position date and expected to apply when the related deferred income tax asset is realized or the deferred tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilized. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. unrecognized deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off such:

- \* Current tax assets against current income tax liabilities and
- \* The deferred taxes relate to the same taxable entity and
- \* The same taxation authority

**2.20 Share Capital and Share Premium**

Ordinary shares are recognized at par value and classified as 'share capital' in equity. Any amounts received over and above the par value of the shares issued are classified as 'share premium' in equity.

**2.21 Statutory Contingency Reserve**

The company maintains contingency reserves in accordance with the provisions of Insurance Act 2003 to cover fluctuations in securities and variations in statistical estimates at the rate equal to the higher of 3% of total premium or 20% of the net profits

**2.22 Retained Earnings**

The retained earnings represent the amount available for dividend distribution to the equity shareholders of the company. See statement of changes in equities for movement in retained earnings.

**2.23 Assets Revaluation Reserve**

This represents the company's revaluation reserve emanating from revaluation of certain assets

**2.24 Income Recognition****2.24.1 Gross Premiums**

Gross premiums on insurance contract are recognized as revenue when payable by the policy holder.

For single premium business revenue is recognised on the date on which the policy is effect.

Gross insurance written premiums comprise the total premiums receivable for the whole period of cover provided by contracts entered into during the accounting period and are recognised on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period for premiums receivable in respect of business written in prior accounting periods.

Premiums collected by intermediaries, but not yet received, are assessed based on estimates from underwriting or past experience and are included in premiums written.

Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the statement of financial position date. Unearned premiums are calculated on a daily pro rata basis. The proportion attributable to subsequent periods is deferred as a provision for unearned premiums.

**2.24.2 Reinsurance Premiums**

Gross reinsurance premiums on insurance contracts are recognized as an expense when payable or on the date on which the policy is effective. Gross reinsurance premiums written comprise the total premiums payable for the whole cover provided by contracts entered into the period and are recognised on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods.

Unearned reinsurance premiums are those proportions of premiums written in a year that relate to periods of risk after the statement of financial position date. Unearned premiums are deferred over the term of the underlying direct insurance policies for risks attaching contracts and over the term of the reinsurance contract for losses-occurring contracts.

**2.24.3 Commission income**

Fees and commission income during the year is the income the company is entitled to for ceding businesses to the reinsurers and co-insurers. In accordance with IFRS 15 (Revenue from Contracts with Customers), fees and commission income is recognized over time, covering the policy period over which services are expected to be provided, using the time apportionment basis. Fees and commission covering the reporting period are recognized in profit or loss as fees and commission income earned, while the unearned portion of fees and commission income is reported in the statement of financial position as deferred commission income.

**2.24.4 Investment Income**

Interest income is recognised in the income statement as it accrues and is calculated by using the effective interest rate method. Fees and commissions that are an integral part of the effective yield of the financial asset or liability are recognised as an adjustment to the effective interest rate of the instrument.

Investment income also includes dividend income which is recognised when the right to receive the payment is established.

Rental income arising from operating leases on investment properties is accounted for on a straight line basis over the lease terms.

**2.24.5 Management and Administrative Fees****Management Fee**

Management fee, an asset based fee is charged as a percentage of the opening net assets value of the pension fund investments at the beginning of the year of charge for the Retirement Savings Account (RSA). It is accrued daily upon portfolio valuation while the actual charge is effected against the Fund within five working days of the month end. Fee for the Retiree Account is computed based on 5% of income earned on the fund.

**Administrative Fee**

Administrative fee is calculated as a flat charge payable monthly from contributions received. It is deducted before converting contributions into accounting units of pension fund assets.

**2.24.6 Realized/Unrealized Gains and Losses**

Realized or unrealized gains and losses recorded in the income statement on investments include gains and losses on financial assets and investment properties. Gains and losses on the sale of investments are calculated as the difference between net sales of investments are calculated as the difference between net sales proceeds and the original carrying or amortized cost and are recorded on occurrence of the sale transaction

**2.25 Claims and Expenses Recognition****2.25.1 Gross Benefits and Claims**

Claims incurred in respect of Insurance contracts include the cost of all claims arising during the year including internal and external claims handling costs that are directly related to the processing and settlement of claims as well as changes in the gross valuation of insurance and investment contract liabilities. All claims paid and incurred are charged against revenue as expenses when incurred.

**2.25.2 Reinsurance Claims**

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contract.

**2.26 Interest Income and Expense**

Interest income and expense are recognized in profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash (or, where appropriate, the next re-pricing date) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the entity estimates future cash flows considering all contractual terms of the financial instruments but not future credit losses.

The calculation of the effective interest rate includes contractual fees and points paid or received transaction costs and discounts or premium that are integral part of the effective interest rate.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

Interest income and expense presented in the financial statement include:

- \* Interest on financial assets and liabilities measured at amortized cost calculated on an effective interest basis
- \* Interest on financial assets measured at fair value through profit or loss calculated on an effective interest rate basis.

## 2.27 Expenses

Expenses are recognised in the income statement when a decrease in future economic benefit related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably. This means, in effect, that recognition of expenses occurs simultaneously with the recognition of an increase in liabilities or a decrease in assets (for example, the accrual of employee entitlements or the depreciation of equipment)

When economic benefits are expected to arise over several accounting periods and the association with income can only be broadly or indirectly determined, expenses are recognised in the income statement on the basis of systematic and rational allocation procedures.

This is often necessary in recognizing the equipment associated with the using up of assets such as property, plant and equipment in such cases the expense is referred to as a depreciation or amortization. These allocation procedures are intended to recognise expenses in the accounting periods in which the economic benefits associated with these items are consumed or expire. An expense is recognised immediately in the income statement when expenditure produces no future economic benefits or when, and to the extent that future economic benefits do not qualify, or cease to qualify, for recognition in the statement of financial position as an asset.

### 2.27.1 Underwriting Expenses

Underwriting expenses comprise acquisition costs and other underwriting expenses. Acquisition costs comprise all direct and indirect costs arising from writing insurance contracts. These costs are charged in the income statement in the period they are incurred.

## 2.28 Impairment of non-financial assets

The company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. An asset's recoverable amount is the higher of an asset's or cash generating unit's fair value less costs to sell and its value in use.

The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or companies' assets. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used.

Impairment losses of continuing operations are recognised in the income statement in those expense categories consistent with the function of the impaired asset, except for property previously revalued where the revaluation was taken to comprehensive income. In this case the impairment is also recognised in comprehensive income up to the amount of any previous revaluation.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the company makes an estimate of recoverable amount. A previous impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case the carrying amount of the asset is increased to its recoverable amount.

The increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the income statement unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase.

## 2.29 Earnings Per Share

The company presents basic earnings per share for its ordinary shares. Basic earnings per share are calculated by dividing the profit attributable to ordinary shareholders of the company by the number of shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

## 2.30 Dividends

Dividends on ordinary shares are recognised as a liability in the year in which they are approved by the company's shareholders. Proposed dividends are not recognised in equity until they have been declared at a general meeting. Dividends for the year that are approved after the statement of financial position date are dealt with as a non-adjusting event after the statement of financial position date.

## 2.31 Comparatives

Where necessary, comparatives have been adjusted to conform to changes in presentation in the current year. Where changes are made and affect the statement of financial position, a third statement of financial position at the beginning of the earliest period presented is presented together with the corresponding notes.

## 2.32 Contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or the company has a present obligation as a result of past events which is not recognised because it is not probable that an outflow of resources will be required to settle the obligation; or the amount cannot be reliably estimated. Contingent liabilities normally comprise of legal claims under arbitration or court process in respect of which a liability is not likely to crystallise.

## 2.33 Contingent assets

Contingent assets are not recognised in the financial statements but are disclosed when, as a result of the past events, it is highly likely that economic benefits will flow to the company, but this will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events which are not wholly within the company's control.

	-	-	-	-

**GOLDLINK Insurance Plc**

Veritas Kapital holds 1,268,064,351 (2021:1,268,314,351) ordinary shares representing 51.53% (2021:51.53%) holdings in Goldlink Insurance Plc as at 30/9/2022.

Goldlink Insurance Plc became associate company of Veritas Kapital in 2011 but was taken over by the regulatory authority - National Insurance Commission (NAICOM) for infraction of insurance regulations and its Board of Directors was dissolved in 2012.

Though Veritas Kapital holds majority shares in Goldlink Insurance Plc. (51.53%) the investment has been treated as an associate and accounted for using equity method at both the Company and Group level.

In arriving at the decision to treat the investment as an associate, the Board of Directors considered if Veritas Kapital has control over Goldlink Insurance Plc based on the requirements of IFRS 10. IFRS 10.5 states that an investor regardless of the nature of its involvement with an entity is required to determine whether it is a parent by assessing whether it controls the investee.

Specifically, IFRS 10 states that an investor controls an investee if and only if the investor has the following:

- Power over the investee;
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect the amount of the investor's returns.

Based on assessment carried out, Directors concluded that Veritas Kapital does not have the power over the investee because the relevant activities of Goldlink Insurance Plc are subject to direction of the NAICOM instituted Board of Directors. The Board of Directors report directly to NAICOM on all its activities and resolutions are subject to the NAICOM ( IFRS 10:B37).

**11 Investment properties**

Investment property comprises of landed properties and buildings held for the purpose of capital appreciation and rental income and are carried at fair value. The fair value of the Investment properties has been determined by external, independent professional valuers, Obiora Okafor & Associates, Real Estate surveyors (FRC/2020/003/00000021867) as at 31 December 2021, having appropriate recognised professional qualifications and recent experience in the locations and categories of the Investment properties being valued. The properties have been valued using the depreciated replacement cost and market value approaches. Valuations are performed on an annual basis and the fair value gains and losses are recognised in the profit or loss account. The valuations were based on market data such as discount rates, rental risk and reversionary rates.

The movement in the fair value of investment properties as at 30 September 2022 is as follows:

	Group 30-Sep-22 N'000	Group 31-Dec-21 N'000	Company 30-Sep-22 N'000	Company 31-Dec-21 N'000
Balance at 1 January	45,000	289,439	45,000	289,439
Addition	-	-	-	-
Disposal	-	(244,439)	-	(244,439)
Fair value gain	-	-	-	-
Balance at 30 September (see note 11c)	45,000	45,000	45,000	45,000

**Measurement of fair value****a Fair value hierarchy.**

The fair value measurement for the investment properties of N45.0 million (2020:N289.44 million) has been categorised as a level 3 fair value based on the inputs into the valuation technique used.

**b Valuation technique and significant unobservable inputs**

The following table shows the valuation technique used in measuring the fair value of investment properties, as well as the significant unobservable inputs used.

Valuation technique	Significant unobservable inputs	between key unobservable inputs and fair value
The fair values are determined by applying the direct market evidence comparative method of valuation to derive the open market value. This valuation model reflects the current price on actual transaction for similar properties in the neighbourhood in recent time. References were made to prices of land and comparable properties in the neighbourhood. The data obtained were analysed and adjustments was made to reflect differences in site area and the actual location, quality of construction and off-site facilities.	<ul style="list-style-type: none"> <li>- Price per square meter</li> <li>- rate of development in the area</li> <li>- Quality of the building</li> <li>- Influx of people and/or businesses to the area</li> </ul>	The estimated fair value would increase(decrease) if the rate of development in the area increases (decreases), quality of the building increases (decreases), influx of people and/or business to the area increases (decreases)

## NOTE TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 30 SEPTEMBER, 2022

C (ii) The movement in the fair value of investment properties as at 30 September 2022 is as follows

	Status of Title Documents	Balance at 1 Jan 2022	Additions	Disposals	Revaluation gain or loss	Balance at 30 September 2022
A unit of 5 bedroom terrace house known as blk B, Ajiran Mews, Ikate Lagos	Deed of Legal Mortgage registered as No. 22, Vol. 2048, Lagos Land Registry.	45,000	-	-	-	45,000
		<u>45,000</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>45,000</u>

## NOTE TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 30 SEPTEMBER, 2022

	30-Sep-22 N'000	30-Sep-21 N'000
<b>12 Goodwill</b>		
The goodwill is arising on acquisitions in the following subsidiaries:		
VG Pension	316,884	316,884
Veritas Health Care Limited	-	-
	<u>316,884</u>	<u>316,884</u>
<b>a Analysis of movement</b>		
Balance at 1 January	316,884	316,884
Impairment (see note 33)	-	-
Balance at 30 September	<u>316,884</u>	<u>316,884</u>

The goodwill recognised on acquisition of Veritas Healthcare Limited ( N69.56 million) was fully impaired.

**The calculation of value-in-use was based on the following key assumptions**

- The cashflows were projected based on the company's approved budget. The cashflows were based on past experiences and were adjusted to reflect expected future performances of the company .

-A terminal growth rate averaging 2.8% for VHCL and 4.6% for VGPL (2020: averaging 2.8% for VHCL and 4.6% for VGPL) was applied in determining the terminal cash flows

- Discount rates (averaging 21.88% for VHCL and 30.9% for VGPL), representing post-tax weighted average cost of capital (WACC), was applied in determining the value in use. Using an iterative process, the pre-tax discount rate of 30.3% for VHCL and 44.9% for VGPL was estimated. The growth rate used to extrapolate terminal cashflows for goodwill impairment testing is consistent with the long term sustainable growth rate for the company.

- The key assumptions described above may change as economic and market conditions change. The Company estimates that reasonably possible changes in these assumptions would not cause the recoverable amount of either CGU to decline below the carrying amount

Assessment of impairment on goodwill was developed by the management of the company.

**13 Intangible assets - Software**

This comprises of acquired computer software which does not form part of a related hardware.

## 17 Trade payables

Trade payables represent amounts payable to reinsurance, co-insurers, agents and brokers at period end. The carrying amounts disclosed below approximate the fair values at the reporting date.

	Group 30-Sep-22 N'000	Group 31-Dec-21 N'000	Company 30-Sep-22 N'000	Company 31-Dec-21 N'000
This is analysed as follows:				
Co-insurance premium payable	63,206	357,745	63,206	357,745
Commission payable	105,999	130,445	105,999	130,445
	<b>169,205</b>	<b>488,190</b>	<b>169,205</b>	<b>488,190</b>

## NOTE TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 30 SEPTEMBER, 2022

	Group 30-Sep-22 N'000	Group 31-Dec-21 N'000	Company 30-Sep-22 N'000	Company 31-Dec-21 N'000
<b>18 Retirement benefit obligation</b>				
Gratuity Scheme				
Balance at 1 January	17,024	14,724	-	-
Contributions / (Payments) in the period	-	2,300	-	-
Balance at 30 September	<u>17,024</u>	<u>17,024</u>	<u>-</u>	<u>-</u>

**Pension scheme**

The employees of the Company are members of a state arranged Pension scheme (Pension Reform Act, 2004) which is managed by several Pension Funds Administrators. The only obligation of the Company with respect to this pension plan is to make the specified contributions.

	Group 30-Sep-22 N'000	Group 31-Dec-21 N'000	Company 30-Sep-22 N'000	Company 31-Dec-21 N'000
<b>19 Provision and other payables</b>				
This is analysed as follows:				
Life insurance fund (Note 19a)	131,417	131,417	131,417	131,417
PAYE tax, VAT, NHF and other remitable deductions	66,939	55,326	46,651	38,773
Staff accounts (see note 19b)	96,314	31,526	29,070	31,526
Accrued professional fees (see note 19c)	97,406	40,992	97,406	40,992
Accrued NAICOM levy	30,922	61,887	30,922	61,887
Supplies & Services Bills Payables (note 19e)	242,667	334,201	121,866	107,373
Other accruals and payables (see note 19f)	88,943	181,486	13,607	137,305
Unclaimed dividends	15,046	15,046	15,046	15,046
Due to employees (see note 3)	9,475	8,545	9,475	8,545
Pension Protection fund(note 19d)	179,554	136,283	-	-
	<u>958,683</u>	<u>996,710</u>	<u>495,460</u>	<u>572,864</u>

a Life insurance fund arose from the business of the defunct Kapital Insurance Company Limited that ceased life business in 2007 because the emerged Unity Kapital is not licensed to carry on life business. The fund was kept in abeyance pending transfer to a life assurance company.

b Staff account balance is in respect of variable pay provision, unremitted amount on behalf of staff to various PFAs for the month of September 2022 and deductions from staff salary to be remitted to their co-operative scheme administrator. As at October 2022, staff related benefits have been fully settled.

c Accrued professional fees include accrual for audit fees, tax review and actuarial fees.

d Pension protection fund represents pension protection fund maintained by the pension fund administrators as a cushion to Pensioner whose pension balance is not enough to guarantee at least 2/3 of the Federal Government minimum wage bill on retirement based on section 82 of the Pension Reform Act, 2014

e Suppliers and service bills payables relates to outstanding payments due to vendors and suppliers for services rendered.

f Included in other accruals are unmatched inflows into various bank accounts and stale unrepresented cheques.

**27 Earnings per share**

Basic earnings per share (kobo)

The calculation of basic earnings per share was based on the profit after tax attributable to ordinary shareholders, and a weighted average number of ordinary shares outstanding on that date calculated as follow:

	Group 30-Sep-22	Group 31-Dec-21	Company 30-Sep-22	Company 31-Dec-21
Profit after tax attributable to equity holders N'000	610,621	344,414	46,496	331,242
Weighted average no. of ordinary shares at end of year '000	6,933,333	6,933,333	6,933,333	6,933,333
Basic earnings per share (kobo)	<u>0.09</u>	<u>0.05</u>	<u>0.01</u>	<u>0.05</u>

The Company does not have any instrument with a dilutive effect on its capital, Hence, the basic earnings per share is same as diluted earnings per share

**44 Hypothecation**

The Company is exposed to a range of financial risks through its financial assets, financial liabilities, reinsurance assets and insurance liabilities. In particular, the key financial risk is that in the long term its investment proceeds will not be sufficient to fund the obligations arising from its insurance and investment contracts. In response to the risk, the Company's assets and liabilities at 30/9/2022 were allocated as follows:

	Policy Holders N'000	Shareholders' Funds N'000	Total N'000
Cash and cash equivalents	1,906,220	156,957	2,063,177

**45 SEGMENT REPORTING****Identification of reportable segments**

The business activities of Veritas Kapital Plc Group are first organized by product and type of service: insurance activities, asset management activities and Health Management activities.

Information regarding the results of each reportable segment is included below. Performance is measured based on segment profit (or loss) before income taxes, as included in the internal management reports that are reviewed by the Group's CEO. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within this industry. Inter-segment pricing is determined on an arm's length basis.

Information reported to the chief operating decision maker (the CEO) for the purposes of resource allocation and assessment of segment performance focuses on types of goods or services delivered or provided. The Company's reportable segments under IFRS 8 are therefore as follows:

- Non-life business
- Pension Administration
- Health Care

**Non-Life Business**

The non-life reportable segment offers a wide variety of insurance products for both personal and corporate customers. The products offer range from engineering, aviation, marine liability, motor liability, oil and energy, bond, fire and property. The main source of income in this segment is the premium received from the insured on risk covered by the entity and the investment income earned on placements and deposit with financial institutions.

**Pension Administration**

This reportable segment include the administration and management of the retirement benefits of members. The administration includes making investment decisions, collection of contribution and making payment to retirees in-line with provisions of Pension Reform Act 2014. The revenue earned includes administration and management fees received and receivable on members' contributions and the Net Asset value of Funds under Management respectively.

**Health Care**

This reportable segment is a National Health Maintenance Organization (HMO) duly licenced and accredited by the National Health Insurance Scheme which provide Health Insurance Services to individuals and organizations in both the private sector and the formal sector under the National Health Insurance Scheme (NHIS).

For the purposes of monitoring segment performance and allocating resources between segments, the Group's Chief Executive monitors the tangible, intangible and financial assets and liabilities attributable to each segment. All assets and liabilities are allocated to reportable segments.

## 46 Risk management framework

**(a) Capital management objectives, policies and approach**

The Company has established the following capital management objectives, policies and approach to managing the risks that affect its capital position:

- (i) To maintain the required level of stability of the Company thereby providing a degree of security to policy holders.
- (ii) To allocate capital efficiently and support the development of business by ensuring that returns on capital employed meet the requirements of policyholders.
- (iii) To retain financial flexibility by maintaining strong liquidity and access to a range of capital markets.
- (iv) To align the profile of assets and liabilities taking account of risks inherent in the business.
- (v) To maintain financial strength to support new business growth and to satisfy the requirements of the policyholders, regulators and stakeholders.
- (vi) To maintain strong credit ratings and healthy capital ratios in order to support its business objectives and maintain its financial strength.

In reporting financial strength, capital and solvency are measured using the rules prescribed by the National Insurance Commission (NAICOM). These regulatory capital tests are based upon required levels of solvency, capital and a series of prudent assumptions in respect of the type of business written. The Company's capital management policy for its insurance and non-insurance business is to hold sufficient capital to cover the statutory requirements based on the NAICOM directives, including any additional amounts required by the regulator.

**(b) Approach to capital management**

The Company seeks to optimise the structure and sources of capital to ensure that it consistently maximises returns to shareholders and policyholders. The Company's approach to managing capital involves managing assets, liabilities and risks in a coordinated way, assessing shortfalls between reported and required capital levels on a regular basis and taking appropriate actions to influence the capital position of the Group in the light of changes in economic conditions and risk characteristics.

The primary source of capital used by the Company is equity shareholders' funds.

The Group has had no significant changes in its policies and processes to its capital structure during the past quarter from previous quarters.

The table below shows the available capital resources as at 30 September:

	2022	2021
Total shareholders' funds	9,366,802	8,986,323
Regulatory required capital	3,000,000	3,000,000
Excess capital reserve	6,366,802	5,986,323

**(c) Regulatory framework**

The insurance industry regulator measures the financial strength of Non-Life Insurers using a Solvency Margin model. NAICOM generally expects non-life insurers to comply with this capital adequacy requirement. Section 24 of the Insurance Act 2003 defines the solvency margin of a non-life insurer as the difference between the admissible assets and liabilities, and this shall not be less than 15% of the net premium income (gross income less reinsurance premium paid), or the minimum capital base (3 billion) whichever is higher.

**48 Financial instruments - Fair values and risk management****(a) Accounting classifications and fair values**

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

In thousands of naira	Note	Carrying amount				Level 1
		Designated at fair value	Amortised cost	Fair value through OCI	Other financial liabilities	
		N'000	N'000	N'000	N'000	N'000
<b>Financial assets measured at fair value</b>						
Fair value through OCI		-	-	83,416	-	83,416
Fair Value through Profit or Loss		66,414	-	-	-	66,414
		66,414	-	83,416	-	149,830
<b>Financial assets not measured at fair value</b>						
Cash and cash equivalents		-	367,200	-	-	367,200
Reinsurance assets <sup>^</sup>		-	510,403	-	-	510,403
Placements		-	3,735,380	-	-	3,735,380
Statutory deposit		-	355,000	-	-	355,000
		-	4,967,982	-	-	4,967,982
<b>Financial liabilities not measured at fair value</b>						
Other payables <sup>*</sup>		-	-	-	958,684	958,684
Trade payables <sup>*</sup>		-	-	-	169,205	169,205
		-	-	-	<b>1,127,889</b>	<b>1,127,889</b>

The Company has disclosed the fair value of each class of financial assets and liabilities in a way that permits the information to be compared with the carrying amounts. In addition, it has reconciled the assets and liabilities to the different categories of financial instruments as defined in IFRS 9 Financial instruments: Recognition and Measurement.

\* The Company has not disclosed the fair values for financial instruments such as receivables, payables and reinsurance assets because their carrying amounts are a reasonable approximation of fair value.

<sup>^</sup> Reinsurance assets excludes prepaid reinsurance, which is not a financial asset (N266.72 million)

<sup>^^</sup> Unquoted equities not measured at fair value comprise of unquoted equities carried at cost as their fair value was not readily available.

**(b) Financial risk management**

The Company has exposure to the following risks arising from financial instruments

Credit risk  
Liquidity risk  
Market risk

**(b)(i) Risk management framework**

The company has an Enterprise -wide Risk Management (ERM) Framework that is responsible for identifying and managing the inherent and residual risks facing the Company. The Company's board of directors has the overall responsibility for the establishment of oversight of the Company's risk management framework. The board of directors has established the Risk Management Committee, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the board of directors on its activities.

The Company's risk management policies are established to identify and analyse the risk faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and Company activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company audit committee oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the result of which are reported to the audit committee.

**(b)(ii) Credit risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment in debt securities.

The carrying amount of financial assets represents the maximum credit exposure.

In addition to credit risks arising out of investments and transactions with clients, Veritas Kapital Assurance actively assumes Credit Risk through the writing of insurance business. Credit Risk can arise when a client defaults on settlement of premium payments and can also arise when its own repayment capability decreases (as reflected in a rating downgrade).

**(c)(iv) Market risk**

Market risk is the risk that changes in market prices - such as foreign exchange rates, interest rates and equity prices - will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the returns.

**Currency risk**

The Company is exposed to currency risk to the extent that there is a mismatch between the currencies in which premium and claims are denominated and the respective functional currencies of the Company. The functional currency of the Company is the Nigerian naira.

The currencies in which these transactions are primarily denominated are the Nigerian naira.

However, the Company receives some premium in foreign currencies and also pays some claims in foreign currencies. The foreign currencies the Company transacts in include euro, british pounds and united states dollars.

**Exposure to currency risk**

The summary quantitative data about the Company's exposure to currency risk as reported to the management of the Company is as follows:

In Thousands of	30 September 2022		30 September 2021	
	Carrying	USD	Carrying value	USD
Cash and cash equivalent	2,063,177		3,225,300	
Financial assets	1,415,843		3,347,552	
Net statements of financial position exposure	3,479,019	0	6,572,852	0

The following significant exchange rates have been applied.

Naira	Period- end spot rate	
	2022	2021
USD 1	415.15	409.66

**Sensitivity analysis**

A reasonably possible strengthening (weakening) of the US dollar against all other currencies at 30 September would have affected the measurement of financial instruments denominated in a foreign currency and affected equity and profit or loss by the amounts show below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

Effects in thousand of naira	Profit or Loss		Equity, net of tax	
	Strengthening	Weakening	Strengthening	Weakening
<b>30 September 2022</b>				
USD (10% movement)	0	0	0	0
<b>30 September 2021</b>				
USD (10% movement)	0	0	0	0

**(c)(v) Interest rate risk**

The Company adopts a policy of ensuring that all its interest rate risk exposure is at a fixed rate.

This eliminates the variability in the risks and returns on the Company's interest bearing assets and liabilities.

**Exposure to interest rate risk**

The interest rate profile of the Company's interest-bearing financial instruments as reported to the management of the Company is as follows.

**30 September 2021**

		Carrying amount				Total	Level 1
In thousands of naira	Note	Designated at fair value	armotised cost	Fair value through OCI	Other Financial liabilities
